## **DETAILED ACTION**

### ***Status of Claims***

1. Claim 1 is pending.
2. Claim 1 is rejected.

### ***Election/Restriction***

3. Applicants' election with traverse of the election of species in Paper No. 6 is acknowledged. The traversal is on the ground(s) that all of the compounds share a common structural moiety with the heterocyclic moiety wherein X is nitrogen or CR<sup>14</sup> and therefore represent a single general inventive concept. This is not found persuasive because these compounds can possess additional heterocyclic rings with variable R<sup>4</sup> and R<sup>6</sup>.

The requirement is still deemed proper and is therefore made FINAL.

### ***Priority***

4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Art Unit: 1205

### *Specification*

5. Applicants are reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 250 words. It is important that the abstract not exceed 250 words in length since the space provided for the abstract on the computer tape used by the printer is limited.

6. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicants' cooperation is requested in correcting any errors of which applicant may become aware in the specification.
7. The following guidelines illustrate the preferred layout and content for patent applications. These guidelines are suggested for the applicants' use.

### **Arrangement of the Specification**

The following order or arrangement is preferred in framing the specification and, except for the title of the invention, each of the lettered items should be preceded by the headings indicated below.

- (a) Title of the Invention.
- (b) Cross-References to Related Applications (if any).
- © Statement as to rights to inventions made under Federally-sponsored research and development (if any).
- (d) Background of the invention.
  - 1. Field of the Invention.
  - 2. Description of the Related Art including information disclosed under 37 CFR 1.97-1.99.
- (e) Summary of the Invention.
- (f) Brief Description of the Drawing.
- (g) Description of the Preferred Embodiment(s).
- (h) Claim(s).
- (I) Abstract of the Disclosure.

***Claim Rejections - 35 USC § 112***

8. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "for the production of drugs" renders the claim vague and indefinite. It is unclear if the compound of claim 1 is being used for as a method of treatment or for the manufacturing of a pharmaceutical.
